Odd Fellows in Luck.

SOUTH PLEASANTON, Cal., April 14.—The flow of gas which was discovered from a well in the Odd Fellows' Cemetery in this place yesterday, is still increasing in volume. This well is but one hundred and twenty feet deep. Gas experts who have seen the Stockton well says the flow exceeds that. The gas was lit up last night and the flames shot out of well 800, 10 feet high from an eight inch tube, though a strong wind was blowing at the time. The Odd Fellows will take steps to incorporate after sufficient investigation has been made of the capacity of the flow. It is now forcing its way through 58 feet of water. Experts think it is an inexhaustible flow.

Huston's Successor.

WASHINGTON, April 14.—A letter from United States Treasurer Huston, resigning his position, and the President's acceptance of the same, dated April 13th, were made public to-day. The resignation takes place upon the appointment and qualification of Huston's successor. Nebeker, who it is understood will succeed Huston as Treasurer, called at the White House this morning and had a talk with the President.

Elizabeth, N.J., In Flames.

ELIZABETH, N.J., April 14.—A big fire is raging on Broad street, and the chief thoroughfare is threatened with destruction. The extent of the blaze has paralized the fire department. The Arcade, the finest building in the city, and which alone cost $150,000, is now in flames.

Anxious for Souvenirs.

BRIDGEPORT, Conn., April 14.—A guard has been placed over the grave of the late P. T. Barnum. Friday after the grave had been rounded up and the floral emblems placed around it, people began to pluck the flowers. The police were compelled to use their clubs to drive away the crowd that was despoiling the floral emblems. Curious people from out of town had gathered around Barnum's lot and were anxious to secure a flower as a keepsake. Two men were detailed to watch the grave during Saturday night. Saturday rumors were freely circulated that the body was to be snatched. The family have become alarmed and have taken the precaution to set a watch over the grave. Last night several men were patrolling the cemetery. The guard will be kept on for some time.

BUENOS AYRES, April 14.—The Minister of the Interior, General Rocar, has resigned.

Ex-Governor Waterman Dead.

SAN DIEGO, Cal., April 13.—Ex-Governor R. W. Waterman died at his residence on Florence Heights last evening at 7:15, of pneumonia, after an illness of only five days. The fact that death was inevitable had been known for 12 hours. The Governor was in a semi-conscious state during the last three days of his life. The end finally came without a struggle and without pain.

SIRS TUPPER AND TYLER

GRAND TRUNK SHAREHOLDERS MEET.

Sir Henry Tyler Indulges in Some Plain Talk—Sir Tupper's Attempt to Buy the Grand Trunk—Tyler's Friends Out-Voted—Adjourned for a Fortnight.

LONDON, April 14.—The recent discussion in the press between Sir Henry Tyler, President of the Grand Trunk Railway of Canada, and Sir Charles Tupper, Canadian High Commissioner, was probably one of the causes of the exceptionally large attendance at the meeting of the shareholders of the company this afternoon. The room was crowded. Sir Henry Tyler delivered a lengthy speech, the chief characteristic of which was its hopeful tone. He believed, he said, that the United States Congress would again legalize the old division of traffic, a matter of great importance. He also had good reason to hope that the Canadian Government will remove the duty on coal, thus saving the Grand Trunk a hundred thousand pounds annually. Regarding Sir Charles Tupper's charges against the company, Sir Henry remarked: "Before the elections we were deserving of every favor from the Government of Canada; but since the elections no language is too bad, no misrepresentations too monstrous, to be hurled at us by the high commissioner." Sir Henry Tyler then proceeded to read to the meeting the private report of Mr. Seargeant, the general manager of the company, of the interview he held with Sir Chas. Tupper. Several shareholders however, promptly interrupted the reading of the report and some confusion ensued. "This is a private affair." "Sir Charles is not here to reply," said another. "It is a one-sided statement," said a third. Amid cheers, however, Sir Henry persevered and declared that the board entirely believed Mr. Sergeant an honorable man. The report declared that Sir Charles Tupper plainly bid for the Grand Trunk vote. Mr. Sergeant, however, declined to swerve from the position of complete independence. At this point Sir Henry was interrupted by a shareholder calling out, "This is all a very ancient story." Sir Henry, having requested silence, said that Sir Charles Tupper had sent a late Grand Trunk station master to Chicago as a special detective to endeavor to discover damaging facts against the Grand Trunk management. That gentleman was now in goal for debt. The laughter which greeted this statement having subsided, Sir Henry proceeded to review Sir Charles Tupper's charges. He declined that in detail they were very strong, but absurd as to the manager of the Chicago and G. T., whose openly expressed annexationist sentiments had been drawn attention to by Sir Charles. Sir Henry said that Mr. Reeves was a very valuable officer, but the company regretted his statement, as the necessity to Canada of annexation to the United States and apologized to the Government for them. It was untrue, Sir Henry said, that a single pass had been given over the whole system to enable an elector to cast his vote for the Liberals. Sir Chas. Tupper had said that the Grand Trunk had never forgiven the Dominion Government for building the Canadian Pacific Railway. "True," Sir Henry remarked, "the Canadian Pacific received six times as much subsidy as the Grand Trunk, but the company only complains of the subsidies to lines uselessly competing with the Grand Trunk (cheers). Sir Charles Tupper then charged the board of this company with extravagance, corruption and jobbery. It is hardly necessary to reply seriously to such general charges, but that came from the high commissioner. Those who know Sir Charles Tupper better than most of the gentlemen present, thought the charge recalled the spectacle of "Satan reproving sin." After considerable laughter and cheers, Sir Henry continued: "If the Grand Trunk was so guilty, why was I, as Sir Charles Tupper wrongfully alleged, offered facilities by the Canadian government to build the Canadian Pacific? Why was our late general manager, Sir Jos. Hickson, knighted? Why was the Grand Trunk before the elections such an excellent body, so well deserving of Government favors? "Sir Chas. Tupper, having made charges, must now have something to prove them. Let him do so. I challenge the High Commissioner to bring any single charge of corruption or jobbery against Sir Joseph Hickson. I will meet him face to face, because I maintain that no line is more honestly worked than the Grand Trunk. No officials tried more than ours to do their best for the company." (Loud cheers). Mr. Jeffreys followed Sir Henry Tyler. He charged the board with extravagant management, and threatened to move for a committee of enquiry. Another speaker attacked Sir Henry Tyler. How, he asked, could he do his duty to the Grand Trunk and the 14 other concerns with which he is connected. A noisy debate followed during which hot words were used both by the friends of the management and their opponent. The report was finally adopted with only five dissenting votes.

The excitement of the meeting reached fever heat when it come to the election of directors. The opponents of Sir Henry Tyler had, it was known, made a close canvass, and the directors had spared no trouble in securing the attendance of them and their friends. The retiring directors were Messrs. Gillespie, Hamilton, Heygate and Lethbridge. Mr. Hill moved and Mr. Caine seconded a motion, that these gentlemen be not re-elected. The amendment was put amid breathless excitement and amidst rousing cheers was carried by a vote of about 60 to 10. After excitement had been somewhat allayed, Sir Henry Tyler demanded a poll. It will take place to-morrow. As Sir Henry made his demand he was greeted by such cries as "This will be a death blow to your connection with the company," and, "you had better go." Amid much excitement a motion to adjourn for a fortnight was carried.

CANADIAN CULLINGS.

The Northern Pacific Does Not Carry out Contract.

WINNIPEG, April 14.—An agreement has been reached between the C.P.R. Company and the Manitoba Government for the immediate extension of the Souris branches of the road to the western boundaries of the province. The Northern Pacific Company have failed to carry out their contract. The C.P.R. are to build 150 miles this season, for which they will receive a bonus of $150,000. The Dominion Coal Company undertakes with the C.P.R. to develop the coal mines, and land coal in Winnipeg from the Souris at $4 per ton.

HE WAS INNOCENT.

The Governor-General Remits the Sentence of George Scott.

Special to the TIMES.

OTTAWA, April 14.—The Governor-General to-day remitted the sentence of two years passed on George Scott, Pullman car conductor, now in Welland jail, for larceny. Scott was sentenced about three weeks ago. Since that time the magistrate who convicted him discovered that he was innocent of the crime and represented this to Lord Stanley with the above result.

WINNIPEG, April 14.—May 7th has been proclaimed arbor day in Manitoba.

The Weavers on Strike.

LONDON, April 14.—Dispatches received this morning from Bradford, Yorkshire, show that the trouble between the authorities and the striking weavers, who yesterday met to protest against their being refused permission to hold meetings in the town hall square, and who only were dispersed after offering a vigorous and obstinate resistance to the police and military, is not yet at an end. At an early hour this morning crowds of angry workmen gathered in the narrow streets of Borough and in the vicinity of the mills. There was much excitement among the strikers on the subject of the arbitrary action of the city officials, who were roundly abused for having invited the presence of troops.

What the "Times" Thinks.

LONDON, April 14.—The Times believes that the Newfoundland delegates will be allowed to appeal at the bar in Parliament, but that it is hardly likely that they will be able to change the Government's intentions in regard to the alleged grievances in connection with the convention with the United States. The Times thinks it would be wise for Newfoundland to make friends with Canada. In the amalgamation interests of the provinces, it says, that probably a convention between Canada and the United States for a conclusion, for which there seems a fair chance next autumn, will contain clauses of sufficient value to Newfoundland to be a balm for her wounds.

San Francisco News.

SAN FRANCISCO, Cal., April 14.—The superior court to-day sustained the ordinance closing pool rooms in this city.

Judge Hoffman is resting easier to-day but the doctors say that he cannot recover.

Voris Blue, sergeant in the United States army, was found dead in bed this morning, having been accidentally asphyxiated by gas. He had intended to go east to-day.

He Buried His Gold.

PARIS, April 13.—M. Blanchon, millionair, and noted for his miserly traits, has just died near Lyons. He left a will in which, after disposing of his fortune, he intimated that other sums would be found buried in his garden. Search was made there and nearly 35,000 francs was discovered concealed in an earthen vessel and buried at a considerable depth.

Will Demand Secretary Porter's Recall.

PARIS, April 14.—The Journal Des Debates to-day published conspicuously advices from its correspondents in Rome, in which it insisted that the Italian Government will demand the withdrawal of Minister Porter if no answer to the Marquis de Rudini is received from the United States to-morrow.

La Grippe in Sheffield.

SHEFFIELD, April 14.—Epidemic influenza prevails here and is causing much suffering. A large number of people, including many physicians, are affected, which is identical in character, symptoms and results with the so-called "Russian epidemic" which prevailed here with fatal results in 1890.

American Artists Snubbed.

PARIS, April 14.—American artists in this city who, for the most part, patronize Julian's academy, have a grievance. Only two works by Americans are hung at the salon. It is supposed that the slight is due to the disfavor in which the old salon management hold M. Julian, who was the principal cause of the recent split.

Smallpox in London.

LONDON, April 14.—Seven patients in London hospital are down with smallpox and two deaths have already occurred.

EUROPEAN DISPATCHES.

THE CZAR ACTS IN A VERY CHILDISH MANNER.

Turkey Fortifies the Dardanelles, but Leaves the Black Sea Open—German Strikers to be Evicted—Old and Tried Officers Will be Asked to Resign.

LONDON, April 14.—A Berlin dispatch says that the Czar has shown his petty jealousy of the beautiful Grand Duchess Vladimir, wife of his eldest brother, by ordering that the lady shall not be permitted hereafter to take part in the reviews of troops. The motive for this order is the persistence of the grand duchess, who belongs to the German house of Mecklenburg, in adhering to her religious faith. The Czarina is also said to be somewhat under her sister-in-law's influence.

THE KAISER WILL REMONSTRATE.

It is said that the Kaiser meditates a remonstrance to Russia on the treatment of German princesses connected with the Imperial family, whose husbands, with perhaps two exceptions, are either lunatics or brutes.

RUSSIA PREPARED FOR ANY EVENT.

A correspondent at Constantinople calls attention to the fact that the Turks have almost entirely neglected the Black Sea approach to Constantinople, and on the other hand the straits and Dardinelles are being steadily fortified with heavy guns, which would be of use against any power but Russia. The correspondent adds that the autumn of this year will see concentrated on Russia's southwest frontier a Russian army sufficiently powerful to meet any event which may possibly startle Europe from its present pacific slumber.

THE THREE GREAT FACTORS.

Capt. Grierson, of the English Royal artillery, who has been attending the German army manoeuvers for the past two years, says that the three great factors which have influenced battle tactics lately are smokeless powder, the magazine and the small calibre rifle. Capt. Grierson thinks that for field artillery smokeless powder is both a boon and a curse. A boon because it gives a clear field for fire, and a curse because it enormously increases the difficulty of seeing the object aimed it.

INFLUENCED BY SOCIALISTIC LITERATURE.

A marine at Kiel, who made an attempt to desert and was captured, has confessed that he was led to make the attempt by reading socialistic literature which had been freely distributed among the marines. The matter is being thoroughly investigated to learn the extent to which the evil has spread.

THEY WILL RESIST EVICTION.

A body of troopers have been sent to Saan Louis, in Rhenish Prussia, where the excitement among the iron mines is increasing. A number of workingmen, who had been discharged on account of their sympathies with labor reform, paraded the streets yesterday, but without committing any violence. The agents of the miners have ordered the discharged workingmen to vacate the dwellings they now occupy, and it is thought that some of the families may attempt to resist eviction. The condition of the discharged miners is deplorable, and many of them are almost without the necessities of life.

TURKEY APOLOGIZES.

The Turkish Government has apologized to Austria for an outrage at Uskeb in Albania. Several Turkish soldiers tore down the beifery of the Catholic church and carried off the bell. Austria demanded satisfaction, with the result stated. The Turks have a strong prejudice against the bells of Catholic churches and outrages used to be common in early times.

THE KAIRER WANTS YOUNGER MEN.

Naval circles in Germany are agitated over the prospect that Admiral Von Dergoltz and other prominent naval officers will soon be invited to retire, leaving their places to be filled, according to the Kaiser's programme, by younger men. The officers whose probable retirement is the subject of discussion, both in naval and military circles, are among the most experienced in the navy.

EPIDEMIC OF LA GRIPPE.

Apprehension of a serious epidemic of influenza is caused by the fact that the disease re-appears in the North of England, where it was first discovered in 1889. Besides prevailing in Sheffield this epidemic form of disease exists throughout the whole of Yorkshire. At Hull the death rate has doubled during the past two weeks. It is significant that the increase is attributed to the presence there of influenza. In Sheffield district, near Hull, the entire population is more or less affected with the disease and a general suspension of labor has been made necessary. The mortality in the district has been heavy. At Birmingham, while the outbreak is of a milder description and less widely spread, a number of persons are suffering from the malady. In Lincolnshire and several other counties come similar reports. In this city there are numerous cases of influenza, but it has not attained the dimensions of an epidemic.

CITIZENS OF LUBECK ENTHUSE.

The citizens of Lubeck have resolved to erect a memorial in commemoration of the Kaiser's visit to their city. They are deeply enthusiastic over the Kaiser's good will for Lubeck, as expressed in his remarks. The socialists arrested at the time of the imperial visit have all been released.

A Decrease in Exports.

BERLIN, April 14.—It is shown by the report of the United States consulate here that there has been a decrease in exports from Northern Germany to the United States for the first quarter of 1891 of $2,429,665, as compared with exports during the corresponding quarter of 1890.

A GREAT ROAD RACE.

APPROACHING CONTEST AMONG CHICAGO WHEELMEN.

Record Breakers are in it—A Track Fourteen Miles Long, from the Heart of the City to Pullman—Lively Struggle Every Year—Good Records Anticipated.

The Pullman road race though essentially Chicagoan, is, nevertheless, an event, toward which every year are turned the eyes of cyclists in every section of the United States.

With mere accident as a parent it has grown into an offspring of such proportions that last year it was an event unequalled in the history of cycling, at least in this country; an event which demonstrated that the wheelman's sport is one appreciated, not only by his fellow wheelmen, but by the general public as well. Thousands of people lined the course last Decoration Day, and the cheers that went up as each cyclist passed, showed that wheeling is a recognized pastime of great importance.

To the general cycling public, however, the race is chiefly important because it uncovers one or more of the men who make up the Chicago racing team, an aggregation which, when the cracks met last summer, had everything its own way, which has, up to date, won 95 per cent. of all the team races in which its riders have competed and has to-day more fast men than that of any other city in the Union.

From the Pullman road race sprang Arthur E. Lumsden, whom the Windy City has christened "Our Artie." His mile in 2:30 flat will stand unsurpassed for years. He was an unknown rider when he entered the Pullman race in '88; he is to-day probably the most widely known amateur wheelman in America. The Pullman race brought to light Winship, who won the first race in '87. He is always sure of a place, and in this respect is the best team race rider in the West. Though he does not often reach the tape first, he is always close up, and is therefore one of the safest riders in the Chicago team.

It is curious to note, in passing, that those who were unearthed by winning the races in '87 and '88, united forces in '89 and made tandem records for the world.

A handicap contest with a generous time limit, the race may be won by men whose reputations may never become more than local; yet, having each year for one of its prizes a valuable medal for the "best time" it is always certain of including among its entries a number of men whose reputation is national. To the cycling world—even to the close readers of the daily papers—it is but necessary to name as certain participants such men as Van Sicklen, the "Old War Horse," who can do his mile under 2:35; Thorne, the "King of Safety Riders," who when out of training, can cover his mile in well under 2:40; Barrett who has made a mile in 2:34; Spooner, who holds the 100-mile championship; Tuttle, Fanning, Winn, Githens, and others of the same class. Each year finds these men at the starting point and the race becomes a battle of cycling giants, a contest which is duplicated only when the League of American Wheelmen has aggregated its talent for the championship series.

"The race is not arranged or intended for the special benefit of those whose breasts and stomachs are beplastered with trophies of victory," said its promoter, recently, "but more in the interest of the great body of wheelmen and for the encouragement of young and ambitious riders. Should it be productive of nothing else but the discovery of a young 'flyer,' each year the work and time on it would be amply rewarded."

As before stated the Pullman road race is an accident. Some time in November, 1886, a number of the members of the Chicago Bicycle Club began casting about for some form of amusement for Decoration day. "Thursday the Thirtieth" is not usually a balmy, summer-like day in the region about the Lake City, but Chicago riders are hardy fellows and push their wheels as merrily through the mud and sleet of winter roads as over the smooth surface of the summer boulevard. Hence it is not strange that a "hare and hound" chase should have been decided on as a proper means of arousing an appetite for savory turkey and juicy mince pie. Strange or not, the result of the talk was the issuance of an invitation to the wheelmen of Chicago to join in such a chase, the course to be from the Leland in the heart of the city, to the Hotel Florence, in Pullman.

While the surveyor had never leveled his transit over the turns and twists to the road to the city of cars, cyclometer-bearing wheels innumerable have traversed it. These have indicated a distance of a trifle over fourteen and three-quarter miles. The first seven miles are macadamized boulevard, over which the highest speed can be obtained.

Then come three miles of ordinary country road, which is generally in fair condition after rain. The next three and a half miles, including the "potato patch" and the "sand hill," over which no wheelman has ever ridden, are rough and uneven, and the scene of many memorable "spills." The remaining one and one-quarter miles are through the town of Pullman, with excellent roadbed, but many annoying right-angle turns.

There were no prizes in the "hare and hound" chase referred to; the love of speeding, a friendly rivalry and a little glory being the only incentive to urge the riders on to victory. The "hares" were Cremin and Kluge, of the Chicago club, Davis and Bowbeer, of the Illinois, and Frennesen, of the Owls. Among the "hounds" of whom there were twenty-five, were such well-known wheelmen as Ingalls, Peters, Ehlert, Riggs, Burley, Ayres, street and White.

Joe Crennan was the first to reach the Pullman hostelry, covering the distance in 1:12, which, at that time, was considered a very creditable performance.

Among those who witnessed the start and finish of this chase was Mr. Robert D. Garden, an enthusiast in wheeling matters. The chase suggested to him the idea of getting up a handicap race over the same course, and under such conditions as would make it popular with wheelmen of all grades of speed. The result was the selection of Decoration Day as the time of the race. Mr. Garden went to work with a will, and owing to his popularity among the men in his line of business and his unbounded enthusiasm, built up, by voluntary subscription, a respectable prize list, aggregating some twenty articles of cycling paraphernalia and a money value of $700.

Thirty-four men, out of a total of forty-one who entered for the race came to the starting point May 30, 1887. The time limit was 16 minutes. N. H. Van Sicklen started at scratch with Robert Ehlert, who refused a small handicap. The winner turned up in H. R. Winship, who started from the 8:30 mark, and covered the distance in 1:02:55, which was the fastest time of the day, thus capturing not only the first prize, valued at $140, but also the $40 medal offered for "best time." H. L. Wheeler, the limit man, finished in 1:15:32. Van Sicklen dropped out early in the race. Ehlert finished twentieth.

In 1888 the entries numbered seventy-six, of whom seventy-one started. The prizes numbered twenty, valued at $750. The limit that year was reduced to 14 minutes, five starters getting it. Van Sicklen was alone on scratch. The day dawned bright and clear. The boulevards were as smooth as a billiard table. Stony Island avenue seemed to have lost many of its ruts and much of its roughness. The "sand hill" and the "potato patch" were at their best. A moderately strong rear wind urged on the riders. These favorable circumstances foreshadowed a breaking of records. Nor were the seekers of new records disappointed. Winship again captured the time medal, making the phenominal record of 53:20, Van Sicklen finished five seconds behind. The winner of the first prize was Arthur E. Lumsden. He entered the race comparatively unknown, and was granted a handicap of eleven minutes. His running time was 1:47. It was his maiden effort, but the remarkable time he made gave promise of greater performances. Those who thus prophesied have not been disappointed, for since that time his star has been in the ascendancy, and his racing career an unbroken line of brilliant successes. To-day, notwithstanding some defeats of the last year, in the judgment of most impartial wheelmen, he stands the fastest amateur in America.

The race this year was productive of a curious and significant incident. W. A. Rhodes, a professional, who was engineered by outside parties for advertising purposes, finished in 54:52, but with true professional instinct he maintained that the time was wrong and the time-keeper prejudiced. It proved conclusively that professional "sideshows" in connection with the race added little to its interest.

In 1889 the race had come to be considered the greatest in the country. It brought 117 entries and 72 starters, despite the fact of heavy roads and threatening sky. The time limit was reduced to 12 minutes, nine men receiving it. With Van Sicklen on scratch were Lumsden and Terry Andre, of Milwaukee. Winship did not start. The race was won by Frank Bodach, of the Aeolus club, who started from the 11 minute mark and covered the distance in 1:13. Lumsden again captured the time medal, making the distance in 56:45, with Van Sicklen one minute and three seconds behind him. Andre finished not a wheel's length behind the "Old War Horse."

In 1889 there was much talk of further reducing the time limit. Eight minutes had many advocates, ten minutes more. The twelve minute limit was finally retained, a vote of the wheelmen, in caucus assembled, deciding it.

So great an event had the race become by this time that prominent cyclists came from the country around and from the far East, not to participate but to witness it. Carriages lined the course for miles from the starting point, coaches covered with merry-makers being plentifully sprinkled among them. Much interest was manifested as to the relative merits of Winship and Meyers, a Peoria lad who is said to have ridden the fastest unofficial mile ever made on a safety. To the sorrow of Winship's friends, the Peorian finished far ahead. Lumsden, of course, captured the time medal, Thorne, Githens, Meyers, Winship, Ehlert and Barrett finishing in order behind him. The best time this year was 56:38. The first man to finish was Charles Knisely, of the Illinois club. The prize list contained thirty-three prizes, aggregated a money value of $1500, the greatest amount ever offered for an amateur race in this country or probably any other.

Already the question is being asked, "Who is to win this year?" That there will be the greatest struggle ever made on the course there can be no doubt. Intense rivalry exists among the numerous clubs of the city, and the Pullman race is its incentive. So far the Chicago Cycling Club has had the best of it, having won the time medal on every occasion and the race with two exceptions. It is estimated that this year over 200 will enter and 150 start.—Post-Intelligencer.

If Your House is on Fire

You put water on the burning timbers, not on the smoke. And if you have catarrh you should attack the disease in the blood, not in your nose. Remove the impure cause, and the local effect subsides. To do this, take Hood's Sarsaparilla, the great purifier, which radically and permanently cures catarrh. It also strengthens the nerves. Be sure to get only Hood's Sarsaparilla.

Bill to Amend the British Columbia Railway Act Passed.

MONDAY, April 13.

The House was called to order at 2 o'clock. Prayer by Rt. Rev. Bishop Cridge.

On the report of the Act for the Protection of Cattle, some slight amendments were made to the bill, and it was left over for further consideration.

The bill to amend the B. C. Railway Act received some slight amending, and the report was adopted. Bill read a third time and passed.

The bill to amend the Constitution Act, by raising sessional indemnity to members, and further defining the Victoria city district, Victoria district and Esquimalt district, was passed through committee and reported complete with amendments.

The bill to amend the Provincial Voters' Act was reported complete without amendments and the report was adopted. The bill was read a third time and passed.

The House rose for recess at 5.15.

EVENING SESSION.

The House reassembled at 8 o'clock.

Mr. Brown presented the report of the special committee in connection with the correspondence between the Government and the Bishop of Westminster re block xii Westminster. The report was referred back, to committee because the evidence was only given in effect. Mr. Brown explained that the committee had done so because a great many maps, etc., had to be examined which would be difficult to hand in as evidence to the House.

Adjourned committee Municipal act, Mr. Booth in the chair.

The committee rose and reported the bill complete with amendments.

The House adjourned at 11.25 p.m.

INLAND INTELLIGENCE.

The Artesian Well Boring Experiments to be Tried Further—General News.

[From the Sentinel.]

Mr. Morrison, who has charge of the artesian boring works, was in Kamloops on Monday. He hoped to renew operations at once at the shaft sunk near Mr. G. B. Martin's ranch last year, and which is down to a depth of 1000 feet. Water was struck at a depth of 900 feet, but not in sufficient quantity, and the intention now is to go down another 500 feet, if necessary, and should the result not be satisfactory, to abandon that site. Experiments will be tried in other districts, many of which are already clamoring for the privilege. It is, we understand, the intention of the Government to advertise the use of the plant, and the district giving the largest bonus will be the one selected, the conditions being favorable. Mr. Morrison is of opinion that he could strike water on the east side of the North Thompson, opposite Kamloops, and there is every reason to hope that such is the case. As the machinery is in the district the experiment will, we trust, be tried. It is satisfactory to know on such high authority as that of Mr. Morrison that machinery can be secured at a comparatively small cost, by which about 500 feet can be bored, and at this depth water is invariably struck. He hopes to have three or four wells sunk this season. In his explorations, Mr. Morrison has met with some splendid samples of carbonate of lime in the Columbia. As this material is invaluable as a cement the discovery is a very important one.

Thomas Brady, who is undergoing eighteen months' imprisonment in Kamloops jail for having stabbed one Wm. Norman at Nelson, on the 8th of July last, on Monday morning made a murderous attack upon constable McLaren, who has charge of the chain gang. Brady is a very powerful fellow, and has anything but a savory history. He twice escaped from jail, but on both occasions was re-captured, and hence he is obliged to wear a pair of manacles instead of one as worn by the other prisoners. Constable McLaren who has charge of the chain gang, had a most providental escape, having been struck with a stone, weighing four pounds, on the side of the face, breaking the zymomatic arch. Brady had also a narrow escape, two revolver cartridges having been emptied at him. He was brought before Judge Spinks on Thursday, and committed for trial.

Mr. Eustace Smith, arrived in Kamloops on Saturday last from England, and on Tuesday left for Lord Aberdeen's range at the Mission, to assist Mr. Majorbanks in the management of same. The farm is one of about 500 acres, and purchased by his Lordship from John McDougall, during his visit to British columbia. It is intended to try fruit growing on on extensive scale, and should this prove a success, as no doubt it will, a canning factory will be established on the property. Mr. T. Conkling, the careful and competent foreman, is sanguine of success.

One of the severest sand storms experienced in Kamloops for a couple of years was that of Thursday last. For hours together clouds of sand charged with alkaline, almost shrouded the hills and valley, and penetrated every nook and crevice. A couple of telephone poles were blown down, and in one of the whirlwinds, a lot of domestic fowls were carried up and thrown over the station house. By evening the storm had abated, when Kamloops looked more like a village of the Sahara than the capital of the interior of British Columbia. The storm was followed by a slight rainfall, which restored things to their nominal condition.

Mr. James McIntosh, and Mrs. McIntosh, celebrated the tenth anniversary of connubial bliss on Thursday last. In the evening a large party of friends assembled at the house and wished their host and hosteness many happy returns of the day.

The water in the Thompson, which has been exceptionally low for the past couple of months, is rising somewhat.

[From the Kootenay Star.]

The little steamer Marion in charge of Capt. Cochrane, and a new scow in charge of Capt. Dick, carrying respectively men and material for the C. & K. Railway, left town Tuesday morning for Sproat. Unfortunately the scow was stranded on a bar about eight miles down the river. After working for two days in an unsuccessful attempt to free the scow, the steamer continued her journey down the river.

A gentleman who lives near the smelter avers that their is a male "silverlocks" in town. He cooked dinner the other day, and had occasion to leave it to do some work. On his return his dinner was gone, but a golden (?) haired acquaintance stood not far off picking his teeth. He says he won't go to law about it, but his visitor will die of indigestion next time he swipes a meal.

Mr. Fred Fraser has decided to go into fruit raising, and will plant an orchard this year, not forgetting small fruits, the culture of which the soil and climate are particularly adapted to. He will always have a good market, and will no doubt do well.

Kamloops young men have decided upon forming a lacrosse club. Will the Revelstoke boys do likewise? They could amuse themselves by playing the Calgarians and Kamloopers.

The river is rising steadily, and a week hence it is expected the steamers of the Columbia & Kootenay Navigation company will be running. As soon as it is definitely known when the first trip will be made, the public will be apprised of the fact.

The Brunswick hotel, at Rogers pass, owned by D. Morris, was burned to the ground on the night of the 3rd inst. The loss is a heavy one, as only a small quantity of the effects were saved from the building. The fire was caused by a defective chimney.

Four more carloads of ore from the Monarch mine at Field arrived at Revelstoke this week for the smelter, and was reduced at the sampling works.

The Columbia river was lower this spring than it has ever been within the knowledge of residents of this place.

Dr. Orton's visit to England was connected with the Revelstoke smelting works, which will start smelting operations as soon as navigation opens, to enable them to get ore from around Kootenay lake, to which access is furnished by the construction of the new C.P.R. spur. Sixty tons a day will be produced, and the bars of gold, silver and lead shipped to Wales for refining. The company contemplate doing the refining themselves in the near future. There is a dispute over the title to the lands, about which Dr. Orton interviewed the Minister of the Interior today. He proposes to institute a suit against the Registrar-General of British Columbia, to set aside the title granted by that province.

A SOLID INVESTMENT

The intended improvements in the neighborhood of Oak Bay Avenue are bound to increase the value of real estate along this street, from 25 to 35 per cent. within the next three or four months. The Tramway will be in operation within the next ninety days, and many other improvements that are about to take place, are bound to bring this property to the front.

Lots ranging from $275 to $500 are now on the market, on very easy terms, and we can recommend them to intending investors as a solid investment. The best bargains in this neighborhood are in our hands exclusively.

GILMORE AND McCANDLESS

CLOTHIERS & HATTERS

Two more cases black worsted suits to hand yesterday. These are solid worsteds, warranted to wear and retain their color. Only $16 a suit.

Another line of men's Tweed Suits at $10. This is a low figure, but the suits don't look like it. They are good value for more money.

Our boys' suits are nearly complete. We have an immense range at our usual low prices.

In men's and boys' pants we show the largest range in the city. Our silk worsted stripes at $5.50, 6, and 6.50 are beauties, and only need to be seen to be appreciated.

The fact that we alter and press suits sold here without extra charge is not to be overlooked by those wanting a good ready-made suit.

There is no doubt but we are doing the Clothing Trade of the Town.

Our stock of mens' suits from $5 to 15 is the largest ever shown in British Columbia.

EXTENSION OF PRINCIPLE.

It would be a waste of valuable space to recapitulate the Quintette's Chinese record, and particularly that of the Premier, which has been especially vacillating. Sufficient to say that the Quintette are unsound; that it is only in the abstract that they are opposed to Chinese cheap labor. It may be observed, however, that the Premier is not happy in his explanation of his present attitude. He tells us that Mr. HASLAM succeeded in convincing him of the danger attending the employment of Chinese in coal mines, but he does not vouchsafe an explanation of the causes which induced him to change his mind. The Premier will confer a favor on the public by explaining how the thing was done. He owes it to Mr. HASLAM. Mr. HASLAM, though he has retired from politics, cannot fail to desire to know whence the cause of his illustrious convert's apostasy. Nor is the Premier more happy in his argument in which he attempts to justify his opposition to the Keith measure than he is in his explanation, or rather his lack of explanation, of the causes which induced him to lapse from Haslamism. If the inhibition of the employment of Chinese in coal mines is unsound now, it was unsound a year ago. If, by passing the KEITH bill, the principle may be extended to canners and farmers, it is equally true that by the passage of the HASLAM bill the principle might have been so extended. It is extraordinary the Premier did not think of that a year ago. Such forgetfulness is passing strange, since at that time he represented an important farming district. But there was an election pending, and as all is fair in love and war, so is forgetfulness and deceit allowable in politics. But though the Premier is palpably inconsistent, it is not that feature of the case we would lay most stress upon. The Premier is no more logical than he is consistent. It is as impossible to establish an analogy between coal mining and canning and farming, as it is to establish an analogy between the occupation of druggist and grocer. If the Premier's analogy be admitted, the law which requires men to qualify to sell drugs may be extended to the man who sells groceries. Nobody, however, thinks of such a thing; nobody questions the expediency of the legislation which requires druggists to qualify for their vocation. Why? The drug business is a specialty. Just so with coal mining. Coal mining is a specialty if there ever was one, and those who engage in it have the same right to be protected against ignorance that have the public against a cheap and irresponsible drug clerk. The Premier, if seldom logical, is almost invariably plausible, but in this instance he is neither. His rant about the extension of principle from coal mines to canners and farmers is as transparent as his efforts at Sunday legislation. But the saddest feature of the whole business is neither the stultification of the Government nor the shady plausibility of the Premier. The sad, sad feature is, that the Government somehow, are poor "reflectors" of the aims, desires and idiosyncrasies of the Independents. When the session began it was the boast of the Independents that the Government should reflect their policy. Have the Government done so? And if so, in what respect? The Independents have crouched only to be kicked. Whenever the Independents ventured a measure that was not local and otherwise innocuous as touching the interests of the Government and their "tillicums," back went the Government's ears and out flew their heels, and the Advertiser has roared with pain. "Reflected!" Yes, as the sooty pot reflects everything that touches it! The Independents will retire to their vines and fig trees next week well sooted. For bread they have been proffered boulders. Fatigued of their importunities to be "reflected," the Government have used them as they would ottomans—that is, the Government have "sat down upon them." A "sickly Opposition" is bad enough, but an epicene political organization is infinitely worse. As with hybrid animals so with hybrid politicians. It never yet happened, nor will it ever happen that a sexless political party can make their policy felt, much less accomplish their ends. Opposed to a coterie whose policy is flesh pots, and who will stand at nothing to confirm that policy, a sexless political organization only sets itself up to be knocked down. Have the Independents learned as much? If they have, they have not lived in vain.

BOOK MAKING.

During the year 1890, 4559 books were published in the United States. Of these 4100 were new books, and of these 3100 were written by American authors. The books written by foreign authors and reproduced in the United States numbered 933. These are statistics by a periodical engaged to the book publishing trade, and therefore are practically correct. The extraordinary feature about these statistics does not lie so much in the number of books printed as in the comparatively small number of people who are supposed to have read these books. It is estimated that only about 10 per cent. of the population read books, the other 90 per cent. are either not readers or are readers of newspapers exclusively. This being the case, it appears that the 4559 books published in the United States were read by only 6,200,000 people. This speaks well for the 6,200,000, but how about the other 90 per cent., or say 60,000,000 non-readers of books? But this is hardly a fair estimate, that is, if it is meant by it that only these who buy books read them, and that these are comprised in the 10 per cent. If there were 6,200,000 purchasers of books last year, the chances are that these books were read by not less than 12,000,000 persons. The conditions of book reading, it may be imagined, are the same as with newspapers. A newspaper with a thousand circulation has, probably, 3000 readers.

Analysis of the character of new books read indicate that the Americans have sought to be amused rather than instructed. One-fourth of the books published in 1890 were books of fiction, one-eighth were books of history, biography and travels, and another eighth scientific works. In the matter of serious books, interest has been lively. Relating to law there were 458 issues, religious 467, poetry and drama only 168, a falling off of the last of over 20 per cent. since 1886. Altogether the showing is not a bad one, and especially bearing in mind the popularity of the magazines and the tremendous circulation of the daily press.

EDITORIAL NOTES.

The London Lancet, a leading medical journal, gives the following facts about liquor drinking in England: It is appalling to find that the drink bill of 1890 amounts to £139,494,470, an increase of £7,282,194 over the sum of the previous year, all common sense and medical science notwithstanding. It is said to be equal to one-twelfth of the estimated income of all persons, to one-fifth of the national debt, and to be eight times more than the income of all the Christian churches. It is not our business to moralize on this expenditure. To us it means so much scirrhosis' Bright's disease, gout, rheumatism, insanity, etc., disabling employment, taking the pleasure out of the life of families and bread out of the mouths of children. The drink bill for last year is larger than for any year but that of 1878, when it was more than one hundred and forty-two millions of pounds.

NEWS FROM NANAIMO.

Accident at Wellington — Petitions Withdrawn—The Carpenters' Union, etc.

NANAIMO, April 13.—Accidents in the Wellington mines are becoming quite common. A man named Moses is reported to have had his jaw smashed by a fall of rock. Nearly all the accidents lately have occurred in No. 5 pit, where the greater number of men are employed.

PETITIONS WITHDRAWN.

The applications for granting licenses to M. Spisak, J. Furry, and T. Wall were yesterday withdrawn. The granting of these licenses had been strenuously opposed by the temperance party of the district, and a hard fight was made. The Templars were represented by Mr. J. Campbell, of Vancouver, who hinted in the event of the court granting a license he would apply for prohibition. The court has repeatedly adjourned, but still the applicants failed to get up a petition that would entitle them to a license.

BROTHERHOOD OF CARPENTERS.

The Carpenters' Union of Nanaimo, which was organized in the fall of last year, was on Saturday evening incorporated with the United Brotherhood of Carpenters and Joiners of America. The charter arrived last week, and the meeting announced for Saturday night, but in consequence of the attraction the wrestling match drew, the meeting was a small one. Officers were elected to govern the order for the ensuing year. The union gave notice last fall that they would demand nine hours work per day, instead of ten, which has now been carried into effect, and the masters are as much satisfied as the men.

INDEPENDENT ORDER OF FORESTERS.

Captain Holden instituted a court of the Independent Order of Foresters in this city last evening. There was a very fair attendance of members and the election of officers took place. The new court is to be known as "Crescent Court," and it is presumed its growth will be rapid, as every inducement is offered to those who desire to join.

LITTLE HAPPENINGS.

The Horticultural and Agricultural Society promises to be thoroughly organized this year.

Mayor Hilbert will give a gold medal for a bicycle race to take place on May 26th.

The first procession of the Nanaimo bicyclists took place to-day and the muster was a large one.

Mr. C. E. Priest, C.E., returned from Jarvis Inlet yesterday, his party having struck, compelling him to come down for more men.

SPORTING INTELLIGENCE.

Matters of Interest Going Forward in the Sporting World, Here and Elsewhere.

BASEBALL.

THE FOUR CLUBS COMPLETE.

The four clubs which will begin to battle on Wednesday for the championship of the Pacific Northwest, seem much stronger in playing ability than last season. They are more evenly matched, too, and the class of ball they will furnish will be of the very best. All of the teams have been practically complete for some time except Spokane Falls, which now comes to the front with a surprisingly strong list of players. Each club enters the race with a small number of men, but they are all carefully picked, and it is expected that the season will witness but very few changes among the players. Each of the clubs has eleven men on its roll, except Seattle, which has one less. Another good pitcher will, however, be added very shortly. The teams will go to the post as follows:

Portland—Tully and Lytle, catchers; Tom Parrott, Wadsworth and Betz, pitchers; Motz, first base; Glenalvin, second base; "Jiggs" Parrott, third base; Durrah, shortstop; Westlake, left field; Lytle or Betz, centre field; George, right field.

Tacoma—Cody and Fuller, catchers; March, Fanning and Donohue, pitchers; Sippi, first base; Ardner, second base; McVey, third base; Moore, shortstop; Routcliff, left field; Berger, centre field; Cody or Fuller, right field.

Spokane Falls—Twineham and Stenzel, catchers; Klopf, Lawson and Conover, pitchers; Turner, first base; Welch, second base; Rathburn, third base; Nulton, shortstop; Stenzel or Lawson, left field; Manassau, centre field; Polhemus, right field.

Seattle—Snyder and Newman, catchers; Camp and Keenan, pitchers; Schoeneck, first base; Zimmer, second base; Irwin, third base; Shea, shortstop; Powell, left field; Newman or a pitcher, centre field; Hernon, right field.

CYCLING.

As there seems to exist some question as to the result of last Saturday's road race, would it not be well to have another race next Saturday debarring the pneumatic tire? This would give Minor an opportunity of entering and competing with Godson, Norgate, Tiedeman, Simpson and any others who might wish to join in. He could have no excuse then as to wheels, every man would be equal, and to make it further so, let the weight of wheels be 40 pounds. Perhaps then Mr. Piper will join in the race; he doesn't seem like a man who will make unnecessary excuses. Anyhow, purely in the interests of sport, there should be no bickering about the result of a race, whether lost or won.

Those falling in with the suggestion might send in their names for entry in the race not later than noon Saturday next to the Sporting Department, TIMES.

CRICKET.

Hudson, who coached the Victoria cricket club last year, has accepted a similar engagement with the Seattle field club this year, and is expected to leave for that city this week.

Mr. Hudson is conceded to be as good a bowler as there is on the Pacific coast, and the wonder here is that the local club has consented to let him go. He worked hard last year for the club, and he is sure to do creditably with the Seattleites.

THE GUN.

The Union Gun Club will meet tomorrow evening.

The annual tournament of the Sportsmen's Association of the Northwest, which covers the territory of Oregon, Washington, Idaho, Montana, and British Columbia, will take place at Spokane Falls the first or second week in June. Some rich purses will be hung up, and several of Seattle's crack shots will probably contest for them.

AQUATIC.

It is likely that canoes will be more popular this year than ever before, although any attempt at boating might readily beat the record of last year, when beyond a couple of scratch races, the Queen's birthday regatta was the only exhibition of boating. The keen interest manifested in all those occasions showed fully how popular boating would be here.

Speaking of Tips.

A tip is a piece of special or valuable information such as this, that Hagyard's Yellow Oil is a prompt and effectual cure for croup, colds, hoarseness, sore throat, rheumatism, neuralgia, sprains or soreness of any kind. Known as reliable over 50 years.

A Cure for Toothache.

Ask your druggist for Gibbons' Tooth ache Gum, prepared by J. A. Gibbons & Co., Toronto. Price 15 cents. oct3eodtm

Martin sells cheap, 47 Johnson street.

There was a quiet wedding last evening at the Bishop's palace between Mr. Jos. Hilliard and Miss Versallila.

Garden or chicken fencing, four feet high, at six cents per foot, at McLennan & McFeely's, 79 Yates street.

Capt. Clarke yesterday disposed of the schooner Lily as she lies, wrecked in Dodges Cove, to Capt. Jacobson for $27.

April showers may be the forerunner of May flowers and they are also certain to bring with them cold in the head, which if neglected, develops into catarrh, perhaps into consumption and death. Nasal Balm never fails to give instant relief, and will permanently cure the worst case of catarrh if faithfully used. Sold by all dealers.

NEWS OF THE CITY.

Chemistry of the Planets.

This will be the title of a lecture by the Rev. Mr. Jenns, at the Y.M.C.A. rooms to-morrow evening. Coming from such a source this topic will prove interesting.

One of Her Shafts Broken.

News was received in the city this morning that the steamer Lottie was lying off Dorsey Island with one of her shafts broken. A tug boat went out to render her assistance in making port.

Nothing in It.

The special committee appointed by the council to investigate the McDonald affidavit, met last night and prepared a report which will be presented to the council. The report will stigmatize the affidavit as a tissue of falsehoods.

A Good Example.

Mr. H. C. Beeton has set a good example in his donation to the Board of Trade rooms of a handsome and useful volume, entitled "Scribner's Statistical Atlas of the United States." The book is a very useful acquisition to the rooms.

School Trustees Meeting.

The regular monthly meeting of the board of school trustees will be held in the city hall this evening at eight o'clock. There is nothing of importance expected to transpire, although the school bill may or may not be discussed.

For San Francisco.

The steamer Walla Walla left the outer dock at 11 o'clock this morning for San Francisco with the following Victoria passengers: Misses Carr, A. Hindmarsh, F. Wilkins, Miss Lenevue, W. E. Osterhout, Miss E. Hood, Miss Cowie, Miss Reid and Mrs. T. Mason.

Repairing the Breach.

Workmen are engaged repairing the Dallas road breach, which fell through some time since and became a menace to public safety. From the look of the material being used, and the preparations made it is not likely that the repaired portion will be the first to give way next.

The Annual Celebration.

During past years the 24th of May celebration has been one of the best means of advertising Victoria in the States, as hundreds of strangers visit the city on that day. This year should be no exception, and therefore every citizen should attend the meeting this evening at the city hall, and help to make the thing a success.

Cowardly Sportsmen.

A report reaches town that there is wholesale slaughter made among grouse and pheasants at Metchosin, and by Victoria (?) sports too, or at least specimens of humanity calling themselves men qualified to carry a gun. A tour made by the police at the proper time, and without due notice, would effectually remedy this.

The Biting Cur Again.

A dog on Chatham street attacked and seriously bit the little son of ex-officer Irving this morning. The little fellow was immediately taken to Dr. Milne, who attended to the wound. The snarling dog nuisance in Victoria becomes greater each day, and owners do not seem to take any means to check it.

Nooksack, Wash.

The boundary division of the Seattle, Lake Shore & Eastern Railway will be turned over to the Northern Pacific about the 15th April, when it will be open for passenger traffic and freight. It is understood that Nooksack City will be a division terminal. This is the line that connects with the Mission branch of the C.P.R.

Real Sport

Engineer Frank Atkinson, of the fire department, waking up to the fact that there is a boom in bicycling this season, has made a silver cup of large dimensions, which (the cup and the dimensions) he offers to the winner of the road race on bicycles of any tires, between W. Deasy and engineer Bush, to Sooke and return. This race will create a sensation.

Coming to Victoria.

Major Hilton will (D.V.) arrive in Victoria on Thursday the 16th instant, and deliver the first of a series of temperance lectures that evening in the First Presbyterian Church. Of the Major's ability as a lecturer and expounder of God's word it is needless to say anything as Victorians have already had an opportunity of hearing him and judging for themselves.

A Clean Job.

A row of unsightly verandahs between Waddington alley and Kelly's tin store, were swept from their original position today by a team of horses, which, being freightened, made a bolt along the sidewalk, carrying the verandah uprights with them. No one was hurt, not even the horses, and it cannot be said that the little escapade has done any injury by doing away with the verandahs.

From the Old Country.

The British bark Marthas C. Fisher, Capt. Lee, which was reported in last evening's TIMES to be beating in from Race Rocks, arrived in the roads last evening, 152 days from London, with a general cargo for Robt. Ward & Co. She had a favorable trip with the exception of one month, during which time she experienced very rough weather and received slight damages. She has amongst her cargo a lot of naval stores and 3000 kegs of powder, all of which she will unload at Esquimalt.

A Quarantine Station.

The Dominion Government yesterday commenced work on a building near the outer wharf, which is to be used as a hog quarantine station. This was made necessary by the decision of the Government to enforce the section in the Animals Contagious Disease act, which makes it necessary to quarantine hogs for twenty-one days after their arrival from the Sound. Owners will have to supply food and look after the animals, the Government supplying the shelter.

Natural History Society.

At the annual meeting of this society, held recently, Mr. Ashdowne Green was re-elected president, Dr. Hazell 1st vice-president, Mr. Deane 2nd vice-president, and Dr. Newcombe secretary. The reports showed that the society had made vast strides during the first year of its existence and looked hopefully forward to the coming year. Arrangements are going forward for printing and publishing a complete account of the society's transactions.

The Empress of India.

A telegram received at the C.P.R office to-day announced the arrival of the steamship Empress of India at Nagaski on the 12th inst. She will leave Yokohama on the 16th.

Sons of St. George.

There were mirth, music and merriment at the smoking concert of the Sons of St. George last evening when the following assisted: Messrs. Jackson, Heath, McDowell, Graham, Penketh, Carter, King, Martin, Wright, Brennan, Robinson, Adler and Tweedie.

Only Summons Cases.

A number of summons cases for infraction of the streets by-law, were the only ones in the police court this morning. All the defendants had complied with the law after being summoned, so they were dismissed on paying $2 each for the costs of the court.

The St. Savior's Concert.

As predicted last evening, the ladies of the bright congregation of St. Savior's, Victoria West, scored an eminent success yesterday in the bazaar, and the concert was a crowning hit. A very large number of people were present and buyers were not few.

Business Change.

It is understood that Mr. William Marchant, whose retirement from the firm of Marchant, Futcher & Co. was recently announced, will travel for the firm of P. A. Nicolle & Co., Kobe, Japan, with whom he has been connected for a long period. Mr. Marchant will, however, still make Victoria his headquarters and home.

A Handsome Dog Missing.

Mr. W. H. Bainbridge is missing his handsome tawny St. Bernard dog. The animal which he prizes very dearly, has not been seen since yesterday and as it would never stay away from home unless forcibly detained, the impression is that he is held by some one if not stolen. Mr. Bainbridge is leaving no stone unturned in the search.

Mind Your Own Business.

Those men always succeed best who mind their own business. The reason is probably because they meet with such little competition. Imperial Cream Tartar Baking Powder is the most successful baking powder in the market because it attends to its own business. It sells on its own merits, not by abusing similar preparations.

Something Choice.

One lot 60x120, Langford street, Victoria West, $725.

House and lot North Park street, a bargain, $2000

Lots Oak Bay avenue, $250 up.

Two houses to let, 5 rooms, $17 each.

Money to loan, etc., etc.

Spent a Pleasant Evening.

A few hours were very pleasantly spent by a large number of people at the entertainment given by the Epworth League last evening to listen to songs, readings and recitations from Miss Humber, Mrs. Hall, Mrs. White, Mrs. Edwards, Mrs. Ball, Messrs. N. Shakespeare, W. Hall, and W. A. Kettler. A feature of the evening were the caricatures drawn by Mr. D. McCall.

That Sewerage Affidavit.

The committee appointed by the council to enquire into the statements made by one James Gregor McDonald in a certain affidavit in respect to some of the Board of Aldermen for 1890, and other well known persons, in connection with sewerage matters, held a meeting last evening. It is understood that a report on the subject will be presented to the council on Wednesday evening next.

Officers Elected.

At a meeting of the Trade and Labor Club, held last evening, at their rooms, in Mallette's Block, the following officers were elected: President, Jno. F. Norris; Vice-President, T. Howell; Secretary, W. H. Ireland; Committee, Messrs. Brown, Robinson, Dickinson, Bragg, Few, Hales, Ottaway, Pearson, Rudd, Berridge, Lee and Fraser. A number of new members are joining the club, which is going along with a boom.

She is Kept Busy.

The tug Lorne, Capt. Jas. Christensen, jr., arrived in the harbor at 2 o'clock this morning from Tacoma, where she had been with the ship Oriental, picked up in the Straits. This is the first ship taken from the Cape to Tacoma by a British tug, but Capt. Christensen hopes it will not be the last. The Lorne leaves for Port Angeles to-night to take the Sea King from there to Departure Bay, where she will take the bark Golden in tow for the Cape.

Laid at Rest.

Almost every member of the Pioneer Society, and many old-timers, turned out this morning to attend the funeral of one of their number. Wm. McNiffe, who was called from the ranks on Saturday afternoon. The funeral cortege left the residence at 10 o'clock for St. Andrew's pro-Cathedral, where Rev. Father Nicolaye celebrated the services for the dead. A large number of carriages followed the remains to their last resting place, in Ross Bay cemetery. The beautiful casket was covered with floral offerings, showing the esteem in which the deceased was held by his friends. Messrs. Jos. Loewen, Wm. Harrison, F. W. Behnsen, P. Walsh, and Pferdner acted as pallbearers.

To Educate Indian Children.

Mr. A. W. Vowell, superintendent of Indian affairs for British Columbia, accompanied by His Lordship the Bishop of Columbias met the leading men of the Indians on the reserve this afternoon, and discussed the subject of establishing a day school for the Indian children. Mr. Vowell has worked very hard to insure the success of similar institutions among the Indians throughout the Province, and has not failed in the attempt. It is not likely that he will do so in this effort either. He is being assisted in this instance by the bishop, who has supplemented the departmental grant by a gift of $200 per annum, which will go to make the school more efficient. The object of the conference was to obtain some promise or guarantee from the parents that their children would regularly attend the school. It is understood that the result of the interview was highly satisfactory, and that a suitable site was chosen for the school which will shortly be erected.

Broke his Collar Bone

Herbert Morris, a young man employed by Dixi H. Ross & Co., this morning fell from a shelf and broke his collar bone. Dr. Helmcken set the broken bone and sent his patient to St. Joseph's hospital, where he is doing well.

The Jubilee Hospital.

The following gentlemen of the Board of the Provincial Jubilee Hospital today met the sewerage committee: Messrs. Joshua Davies, H. M. Yates, A. C. Flummerfelt, and J. S. Yates. Mr. Thomas R. Smith, the president, was absent through illness. The meeting was to consider the question of sewerage for the hospital, and the civic committee recognizing the importance of the question, decided to recommend the matter to the city council for action. The plan proposed by Mr. Mohun, sewerage engineer, was looked upon favorably. It is to bring the sewer down from the hospital grounds through Richmond avenue, to join with the city sewer at Moss street.

Dem Sable Serenaders

Don't miss the Sable Serenader's entertainment this evening. The vocal and instrumental portion of the programme is such that has never before been presented to an audience in this city. The interlocutory part is composed of harmless but side-splitting j s etc. Bring sticking plaster and bandages! The success of the entertainment is almost assured, but there being plenty of room in the Theatre it is to be hoped that a full house will reward the performers for their labors. The whole of the coop are city boys, who have spared no pains to follow in the footsteps of the world renowned Christy Minstrels of the St. James Hall, London. The good cause to which the proceeds will be applied, deserves the hearty support of the inhabitants of Victoria. The following will be the

THOROUGHBRED STALLION

"KISBER"

will make the season of 1891 at the Victoria Jockey Club Race Track, Victoria.

Kisber by imp. Billet (sire of Volturno, Miss Woodford—2 mile heats, 3.33, 3.31; best on record—Lizzie S. Raceland, etc.) by Voltigeur (winner of Derby and St. Leger) and sire of Vidette (winner of 2000 guineas, sire of Gandevisure (winner of Cambridgeshire), Speculum (winner of City and Suburban), Galopin (winner of Derby and sire of Donovan, St. Simon, Galliard, King Galop, etc.) out of Miss Knight by imp. Knight of St. George (winner of St. Leger, by Irish Birdcatcher, second dam Evelyn, by American Eclipse (sire of Medoc, Zenith, Lady Relief, Gano Goliah, Mingo, Floranthe, Counterplot, Konmouth, Eclipse, etc.) 3rd dam Hanna Marie, by Gohanna. Further see Bruce's Stud Book, or apply to the undersigned.

DESCRIPTION.

Kisber is a handsome brown bay, 15.3½ hands high—a well formed and finely finished horse, with plenty of bone and excellent action, possessing a perfect temper, intelligent, level headed and game. Backed with three crosses of stout Whalebone blood through Sir Hercules and Touchstone. An analysis of his blood lines shows not a single cross not noted for speed and endurance.

TERMS FOR 1891.

$35 for the season payable at time of service with privilege of return in season of 1892 in event of mare not proving in foal and not having changed owners.

KISBER STAKES—OWNER'S OFFER.

A stake of $300, with $40 entrance fee to be added to stake upon condition that 25 mares be bred to Kisber on above terms this season, to be run for in 1894—open to 2 year olds, the get of Kisber—stake divided, 70% to 1st, 30% to 2nd horse—5 furlongs dash—weight and date of race announced later.

NOTE—The winner of any Stallion Produce 2 Year Old Stakes is not barred from the Queen's Plate and Derby.

AMBASSADOR HERBETTE.

Complains of the Attitude of the Kaiser Towards Himself.

PARIS, April 14.—M. Herbette, the French ambassador to Germany, has sent to M. Ribot, French Minister of Foreign Affairs, a dispatch full of misgivings as to the nature of the ambassador's relations with the Berlin foreign office. M. Herbette says that Chancellor Von Caprivi treats him with formal politeness, while the German Emperor, who was formerly invariably affable in his manner now speaks curtly and has shown positive ill-humor towards the Frenchmen whom Herbette has introduced at receptions. This news causes increased anxiety in Government circles here. If the French Government ascertains that the Kaiser's altered attitude towards Herbette arises from dissatisfaction over the treatment received by the Empress Frederick in Paris, his early recall is certain. So far as is known in official circles, the Kaiser exonerated Herbette from all blame in the matter.

SCANDAL IN LONDON.

Prominent Politician in Trouble—Escapes to the Continent.

LONDON, April 14.—A warrant has been issued for the arrest of Capt. Edmund Hope Verney, R.N., Liberal member of Parliament for North Bucks, on a charge of procuring a girl for immoral purposes. It is alleged that the offense was committed last autumn, Verney giving his name as Wilson. The identity of the culprit was discovered a few days ago, when steps were at once taken against Verney, but it is believed that he has escaped to the continent. The accused is a leading county magnate, a magistrate and a member of the London county council. The news of his disgrace caused a great sensation. Capt. Verney is the eldest son of Right Hon. Sir Harry Verney, Bart. He was born in 1838, and was educated at Harrow school. Capt. Verney was married in 1868 to Margaret, eldest daughter of the late Sir John Hay Williams. He is a retired captain in the navy, and has served in the Crimea and in the Indian mutiny. He is also chairman of the Quarter Sessions for Anglesey, a justice of the peace for Anglesey and Buckinghamshire, and a member of the Anglesey council. Capt. Verney sat in Parliament for North Buckinghamshire in 1885-6, and was re-elected in 1889. He is the author of the "Shannon's Brigade in India," the "Last Four Days of the Eurydice," "Village Sketches," and "Four Years of Protest in the Transvaal." In politics Capt. Verney is a Liberal, in favor of home rule, local option, land reform and reform of the municipal government. He is also a member of the Travelers Club, the United Service Club and the National Liberal Club. His estate at Rhianva, Anglesey, is a beautiful place.

Capt. Verney was well known to all old Victorians. He was on this station in 1864-5, in command of the gunboat Grappler, and had a villa at Esquimalt, where he kept open house for all his friends.

SAVINGS BANK FAILURE.

Capt. Webb Speaks His Mind, and Creates a Sensation.

TOPEKA, Kansas, April 14.—It was learned that there was a very sensational scene Saturday evening at the meeting of the creditors of the defunct United States savings bank. The meeting was with locked doors, the scheme being to put one of the ex-officials of the bank, which failed a month ago, in charge of its affairs as receiver. Almost the entire stock of the bank is owned in Boston and Philadelphia. The meeting started off well in the cut and dried plan. The clerks' office was crowded with men and women whose hard earned dollars had been entrusted to the corporation. A sensation was created when Captain Webb asked to be allowed, as a creditor, to say a few words. Webb said, "I have taken considerable trouble to investigate the affairs of this corporation, and I find that the officials of the bank have been guilty of lying and perjury from the time they made an application for a charter at the state house down to the last paper that was drawn. Not only this, I find they have never had the capital they represented. Instead of having $261,000 capital, as they said they had, I find that they had not more than $100,000 less than that amount. I don't believe it is to the interest of the creditors to elect an assignee to be the tool of these crooked officials, and I don't believe it is to the interest of the creditors to elect a man who is not personally interested as a creditor or a shareholder." Efforts were made to choke Webb off, and the clerk began calling the list of creditors. Some voted for Lowe, late cashier of the bank, and others for Brian Roberts, but probably not one-third of these persons voted. It was found, during the confusion that two-thirds had not voted, and no choice was made. The affairs of the bank will be investigated by the court.

Talk's cheap, but when it's backed up by a pledge of *hard cash* of a financially responsible firm, or company, of world-wide reputation for fair and honorable dealing, *it means business!*

Now, there are scores of sarsaparillas and other blood purifiers, all cracked up to be the best, purest, most peculiar and wonderful, but bear in mind (for your own sake), there's only *one guaranteed* blood-purifier and remedy for torpid liver and all diseases that come from bad blood.

That *one*—standing solitary and alone—*sold on trial*, is

Dr. Pierce's Golden Medical Discovery.

If it doesn't do good in skin, scalp and scrofulous diseases—and pulmonary consumption is only lung scrofula—just let it's makers know and get your money back.

Talk's cheap, but to back a poor medicine, or a common one, by selling it *on trial*, as "Golden Medical Discovery" is sold, would bankrupt the largest fortune.

Talk's cheap, but only "Discovery" is *guaranteed*.

IT is estimated that water leaking through a hole just large enough to pass a needle through, during twenty-four hours, at a 14-pound pressure, would be sufficient to supply a house for a day. The waste through a one-inch pipe under the same conditions would be 1,140 gallons.

THE greatest meat-eaters in the world are the people of America, whose average consumption is 175 pounds per annum. The English come next, with an average of a little over 110 pounds. The French eat only half as much meat as the English, and the people of Germany, Austria and Italy still less.

CASTOR gloves have had quite a history. The word indicates the skin of the beaver, but the best French castor gloves were formerly made of thin deerskin, and were soft, durable and expensive. OH, MY BACK!

STOP IT NOW.

SOON IT WILL BE TOO LATE.

I have been troubled many years with disease of the kidneys and have tried many different remedies and have sought aid from different physicians without relief. About the 15th of April I was suffering from a very violent attack that almost prostrated me in such a manner that I was bent over. When I sat down it was almost impossible for me to get up alone, or to put on my clothes, when that Providence sent Dr. Henley, with the OREGON KIDNEY TEA, to my hotel. I immediately commenced using the tea. It had an almost miraculous effect, and to the astonishment of all the guests at the hotel, in a few days, I am happy to state, that I was a new man. I will recommend the tea to all afflicted as I have been.

WORK FOR THE ALBION.

Twelve New Special Boilers to be Built for the Moodyville Sawmill.

Mr. Randall, master mechanic of the Moodyville Sawmill Company, will visit Victoria probably this week, to superintend the construction of twelve large boilers, of a collective horse-power of one thousand, to be used in the sawmills at Moodyville.

The boilers are of a special design, and will be constructed by the Albion Iron Works from plans drafted by Mr. Randall. The style is of an original character, made with a view to obtain the most possible steaming power from the heat obtained from sawdust and mill refuse.

The cost is estimated in the neighborhood of $10,000, and the job will keep the boiler making department of the Albion Iron Works busy for some time to come.

AROUND THE OCEAN DOCK.

The New Shed on Rithet's Wharf—Work on Brackman & Ker's New Mill.

The lively manner in which work is being prosecuted around the outer wharf shows conclusively that Messrs. R. P. Rithet & Co., are aware of the importance of Victoria as a shipping centre. The new shed that is being erected over the whole area of the original wharf is being built in as solid a way as it is possible. Natural pine knees are being put in and all the timbers are massive and solid. A tramway has been built from the land warehouses out to the end of the pier, which will make the loading of ships and steamers an easy matter.

Work on the new dock is also progressing rapidly, the breakwater being almost completed. As soon as it is ready the clam shell for unloading scows, filled by the dredge, will be placed on rail so that it can be easily handled. It will do the work that would otherwise have to be done by hand, in about one third the time that it could be done by picks, shovels and wheelbarrows, consequently it will not be a very long time before Victoria has the best dock on the coast.

On the inner side of the point liveliness also reigns, a large gang of men being at work on the site for Brackman & Ker's new mill, which, like those works being done by Rithet & Co., is going to be solid.

A FATAL EXPLOSION.

Three Men Killed on the Columbia and Kootenay Grade.

From the Miner.]

A frightful accident took place in a rock cut about two miles below Nelson, on Monday, March 30th. At about 6 o'clock in the afternoon a 22 foot hole, loaded with ten kegs of black powder and a case of dynamite, and primed with a 19-foot fuse, was fired. The men had returned from the cut where they had gone for safety, and proceeded to work again. Mr. McCammon and the foreman had climbed on top of the bluff into which the hole had been drilled, and were discussing the effect of the blast—which had not done as much as Smith had expected—when they observed dense smoke issuing from one or two crevices in the rock, and they immediately apprehended danger. Before they had time to do anything, before they had time to speak, the cliff beneath them heaved and split, and the granite hills on every side rang with the echo of a loud report that struck terror to the hearts of the men working in the immediate vicinity. When the roar had subsided, Mr. McCammon found himself sitting on a mound of earth, uninjured, and Mr. Smith came to consciousness at the bottom of the cliff, where he had landed on a pile of rocks. A relief crew was quickly organized, and rushed to the scene of the accident, to engage in the work of disintombing their unfortunate mates. They were met by a man running towards the boat, his head and face and neck bathed in the blood that poured from wounds all over his head, and frantically waving in the air the mangled remains of a hand. It was August Johnson, one of Smith's best men. The next man extracted from the rocks, whose jagged edges cut like a knife, was Henry Martin. He was so badly smashed that he had to be wound in a blanket to be taken to the boat. The third was James Ryan, a powder-man; a huge stone of about three tons weight was pressing him onto the points of two triangular pieces of rock that squeezed his body to a thinness of about three inches. He was conscious when relieved, but vomiting blood. The last to be unearthed was Justus Mathison. A great boulder had fallen forward and literally crushed him into a ball, while flying rocks had nearly torn him limb from limb. He died shortly afterwards. They were taken to the headquarters camp and had just been housed when Dr. Arthur and W. Gesner Allan arrived from Nelson.

Justus Mathison (alias Korpi), Henry Martin (alias Huntula) and James Ryan all received fatal injuries. The first named died on March 30, and the two latter the day following.

Tourist Spoons and Opera Glasses.

He has also just received a consignment of beautiful opera glasses, in pearl and Russia leather, which are pronounced the finest ever imported to this city.

No Bogus Phenomenon.

A very serious, and at the same time, a very unusual mistake occurred last evening. People on the streets regarded the firmament in which shone a bright new moon, and at the same time they pointed excitedly at the electric light poles, the tops of which were adorned with a glowing lamp. Such a phenomenon had never been heard of before, and there was much talking done in consequence. On enquiry it was found that the man who mends the moon and electric light, had lost his calendar, and believing the moon had made a mistake in coming out too early, he would not put out the electric light. He says the event shall never occur again.

Stammering Cured.

* * *. I have recently investigated Mr. E. R. Dumont's method of curing stammering, particularly noting its result in the case of a youth of this city who has been most painfully afflicted. In this instance the method has been surprisingly successful; the young man being now wholly free from his old trouble. If carefully followed I am confident the method will conquer any case of stammering or stuttering. I find Mr. Dumont a thorough master of his specialty. He certainly is engaged in a good work, and I commend him to all who need his services.

The Victorian.

The steamer Victorian, which is to be added to the Sound fleet, is rapidly nearing completion. She is being completed at Portland and as soon as the work is finished she will be sent to the Sound and Victoria. The machinery is in place, the pipes are connected and but little work remains to be done in this department. A large force of carpenters and a larger force of painters are busy all over the boat putting on the finishing touches to the cabins, staterooms and saloons. The panels of the cabin walls will be of lincrusta walton, most of which have been received from the East and are being put in place. These are being painted and decorated in keeping with the rest of the boat, and with the stained glass windows and dome and the rich covering of the interior woodwork will make the steamer a palace afloat. On the decks another crew is at work finishing up the exterior. The pilot's bridge has been erected and the steamer is beginning to assume the appearance of a sea-going vessel.

Then and Now.

A quarter of a century has passed (just 25 years ago to-day) since the good old steamer Labouchere left the harbor of San Francisco, bound to Victoria, with a good freight and a large number of passengers. The vessel was the property of the Hudsons' Bay Co., and had just been subsidized as the colonial mail boat, between San Francisco and Victoria, this being a crown colony at the time. She was one of the old style, sidewheel type, with old fashioned English built engines, but her hull was built as strong as wood, copper and iron, could possibly make it. Four hours out from 'Frisco, in a thick fog, at 10 o'clock at night, she struck on the south head of Point El Reyes, on the coast of California, and sunk in 40 fathoms of water, six miles off shore, the next morning at 6 o'clock. But three lives were lost, due to the fortunate fact of the weather being favorable. Her loss was a great drawback to the prosperity of the town at that time. It was long before the days of continental railways, telegraphs, telephones, and all the various inventions that have appeared. All communication with the outer world was made by sail or steamers to San Francisco, or by the circuitous ways of Puget Sound. The arrival of a mail steamer from San Francisco, was an event of great importance to the town. All promised payments were made from the arrival of one steamer to another, and steamer day (every 10 days) was an event fraught with much importance and anxiety to business men of this city. The mails were also very irregular, and Wells, Fargo & Co. carried the majority of the correspondence, and always carefully and promptly. A mail steamer trip from San Francisco was considered quick in four days, and nothing unusual in six days. Nearly all were side-wheelers and the compound or triple expansion engine was not known. A great deal of the carrying trade in freights was brought by the old-fashioned lumber droger or sailing vessel, which generally took a load of coal or lumber on her return trip. Even the local trade between Victoria, Nanaimo, Westminster and Puget Sound, was mainly done by sailing vessels, principally schooners. Since these medieval times, all has been greatly changed. Our ocean and inland marine fleet now consists of fast steamers, and a nearly all-rail communication can now be made, where formerly only water communication was in vogue. Of those who sailed from San Francisco on the last trip of the good old Labouchere, but few now are in the land of the living, or reside in this Province. Of them all there remain but Elliot, of the Willows (her chief engineer); Davy Stevens, of the Princess Louise, her first assistant; Chas. Warren, her purser; Scott, the steward; the two sons of Capt. Mouet, her commander (who died at Fort Rupert), Edward Dickerson and Frank Sylvester.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

Makes the Weak Strong

The marked benefit which people in run down or weakened state of health derive from Hood's Sarsaparilla, conclusively proves the claim that this medicine "makes the weak strong." It does not act like a stimulant, imparting fictitious strength from which there must follow a reaction of greater weakness than before, but in the most natural way Hood's Sarsaparilla overcomes

That Tired Feeling

creates an appetite, purifies the blood, and, in short, gives great bodily, nerve, mental and digestive strength.

"I derived very much benefit from Hood's Sarsaparilla, which I took for general debility. It built me right up, and gave me an excellent appetite." ED. JENKINS, Mt. Savage, Md.

Fagged Out

"Last spring I was completely fagged out. My strength left me and I felt sick and miserable all the time, so that I could hardly attend to my business. I took one bottle of Hood's Sarsaparilla, and it cured me. There is nothing like it." R. C. BEGOLE, Editor Enterprise, Belleville, Mich.

Worn Out

"Hood's Sarsaparilla restored me to good health. Indeed, I might say truthfully it saved my life. To one feeling tired and worn out I would earnestly recommend a trial of Hood's Sarsaparilla." MRS. FRENE MOSHER, 90 Brooks Street, East Boston, Mass.

COAL

The New Vancouver Coal Mining & Land Co., Ltd.

(FORMERLY THE VANCOUVER COAL CO.),

ARE THE LARGEST COAL PRODUCERS ON THE PACIFIC COAST.

THE NANAIMO COAL

(Used principally for Gas and Domestic Purposes).

THE SOUTH FIELD COAL

(Steam Fuel).

THE NEW WELLINGTON COAL

(House and Steam Coal) are mined by this Company only.

THE "NANAIMO" COAL gives a large percentage of Gas, a high Illuminating Power, unequalled by any other Bituminous Gas Coal the world, and a superior quality of Coke.

THE "SOUTH FIELD" COAL is now used by all the Leading Steamship Lines on the Pacific.

THE "NEW WELLINGTON" COAL, which was introduced early in the present year, has already become a favorite fuel for domestic purposes. It is a clean, hard coal, makes a bright and cheerful fire, and its lasting qualities make it the most economical fuel in the market.

The several Mines of the Company are connected with their Wharves at Nanaimo and Departure Bay, where ships of the largest tonnage are loaded at all states of the tide. Special dispatch is given to Mail and Ocean steamers.
